

Your Perfect Choice for Book Scanning

Features:

- The slightly slanted front platform makes book scanning a breeze
- Support A3-sized document
- Brightness and contrast controls to customize color output for specific applications
- Hi-speed USB 2.0 interface
- Includes TWAIN and ISIS Driver
- One button functionality allows you to assign up to 9 scanning applications and perform at the touch of a button

Avision's book edge scanners feature a unique, innovative flatbed platform, with a slanted front edge engineered to accommodate books in a way that prevents the dark, shadowy area near the spine from appearing. Curved text often seen near the center is also eliminated, since this special design allows pages to spread flat on the scanner. Never again would you need to press the book against the scanner, which distorts the scanned image and potentially damages the book.

The FB6280E supports documents up to A3 sizes. Its core image processing components are CCD based with a 600 dpi optical resolution, enabling it to output picture perfect quality while meeting the most stringent demands of business professionals anywhere.
