Liability

While all efforts have been made to ensure the accuracy of all contents in this manual, we assume no liability for errors or omissions or by statements of any kind in this manual, whether such errors are omissions or statements resulting from negligence, accidents, or any other cause. The contents of this manual are subject to change without notice. We will not shoulder any legal liability, if users failed to follow the operation instructions in this manual.

Copyright

The scanning of certain documents, for example checks, bank notes, I.D. cards, government bonds, or public documents, may be prohibited by law and/or subject to criminal prosecution. We recommend you to be responsible and respectful of the copyrights laws when you are scanning books, magazines, journals and other materials.

Environmental Information

Recycle or disposal at end-of-life information, please ask local distributors or suppliers for recycle and disposal information. The product is designed and produced to achieve sustainable environmental improvement. We strive to produce products in compliance with global environmental standards. Please consult your local authorities for proper disposal.

The product packaging is recyclable.

Attention for recycling (For EU country only)

Protect your environment! This product should not be thrown into the household waste container. Please give it to the free collecting center in your community.

Screen Examples in This Manual

The screen shots in this guide were made with Mac OS X 10.8. If you are using OS X 10.9 / 10.10 / 10.11 / 10.12 / 10.13, your screen will look somewhat different but functions the same.

INTRODUCTION

Thank you for choosing us as your scanner supplier. Your new scanner will improve the professionalism of your day-to-day computing tasks by allowing you to input images and electronic text into your computer system. You can easily scan single-sided or double-sided documents with your scanner.

Like all of our products, your new scanner is thoroughly tested and backed by our reputation for unsurpassed dependability and customer satisfaction. We hope you will continue to turn to us for additional quality products as your computing needs and interests grow.

HOW TO USE THIS GUIDE

This User's Guide provides instructions and illustrations on how to install and operate your scanner. This guide assumes the user is familiar with Apple Mac OS X. If this is not the case, we suggest you learn more about Apple Mac OS X by referring to your Apple Mac OS X manual before using your scanner.

The Introduction section of this manual describes the box contents and minimum computer requirements to use this scanner. Before you start installing your scanner, check the box contents to make sure all parts are included. If any items are damaged or missing, please contact the vendor where you purchased your scanner or our customer service directly.

Chapter I describes how to install scanner's software and connect the scanner to your computer. Note: The scanner connects to your computer through the Universal Serial Bus (USB). If your computer does not support USB technology, you will need to purchase a USB interface card to add USB capabilities to your computer, or buy and install USB connectors if your motherboard has USB capabilities. This guide assumes that your computer is USB-ready and has a free USB port.

Chapter II describes how to use your scanner.

Chapter III describes how to maintain and clean your scanner.

Chapter IV contains technical support information that can help you solve simple problems.

Appendix A contains the specifications of the scanner you purchased.

Appendix B contains our customer service, the limited warranty agreement and FCC statement concerning the product.

CONVENTIONS OF THIS GUIDE

Bold —Represents commands or contents on your computer screen.

ALL CAPS —Important note or first use of an important term in a chapter.

Italic —Represents buttons on your scanner OR important notes.

A Note about Icons

This guide uses the following icons to point out information that deserves special attention.

Warning

A procedure that must be followed carefully to prevent injury, or accidents.

Attention

Instructions that are important to remember and may prevent mistakes.

Information

Optional tips for your reference.

SAFETY PRECAUTIONS

Warning

Before using this device, please read the following important information to eliminate or reduce any possibility of causing damage and personal injury.

1. Usage, the product is for indoor use in dry locations. Moisture condensation may occur inside this device and cause malfunction at these conditions:
 - when this device is moved directly from a cold to a warm location;
 - after a cold room is heated;
 - when this device is placed in a damp room.To avoid the moisture condensation, you are recommended to follow the procedure:
 - i. Seal this device in a plastic bag for it to adapt to room conditions.
 - ii. Wait for 1-2 hours before removing this device from the bag.
2. Do use the AC adapter and USB cable provided with the scanner. Use of other AC adapter and cables may lead to malfunction.
3. Keep the space around the AC adapter clear in case you need to quickly unplug the AC adapter during emergencies.

4. Damaged wire could cause fire or electrical shock. Keep the power cord straight and without being twisted, bended, or scraped.
5. Unplug this device if you don't need to use for a certain period of time, such as, during night or long weekend, to avoid any risks of causing fire.
6. Do not attempt to disassemble the scanner. There is danger of an electrical shock and opening your scanner will void your warranty.
7. Be sure not to bump or knock the scanner glass as it is fragile and could break.
8. Do not subject the scanner to excessive vibration. It may damage the internal components.

MINIMUM SYSTEM REQUIREMENTS¹

- PC with Intel Pentium® IV 2.4 GHz processor or compatible
- 1 GB RAM
- Available USB 2.0 port
- CD-ROM Drive
- 2 GB Free Hard Disk Space
- Video card that supports 16-bit color or greater
- Operating System: Apple Mac OS X 10.8 / 10.9 / 10.10 / 10.11 / 10.12 / 10.13

Information

Systems with 2 GB RAM and 3 GB free hard disk space are recommended for optimal performance.

¹ Higher requirements may be needed when scanning or editing large quantities of images. The system requirements stated are only a guideline, generally the better the computer (motherboard, processor, hard disk, RAM, video graphic card), the better the results.

BOX CONTENTS²

1. Scanner
2. USB Cable
3. AC Adapter
4. Stacker
5. Quick Guide
6. Mac Setup/Application CD-ROM
7. Calibration Sheet
8. Extended Paper Width Slider³ (2 pieces)
9. Protection Sheet⁴
10. Padded Carry Bag⁵
11. Cleansing Cloth
12. Pad Module⁶

² Save the box and packing materials in case you need to transport this scanner in the future.

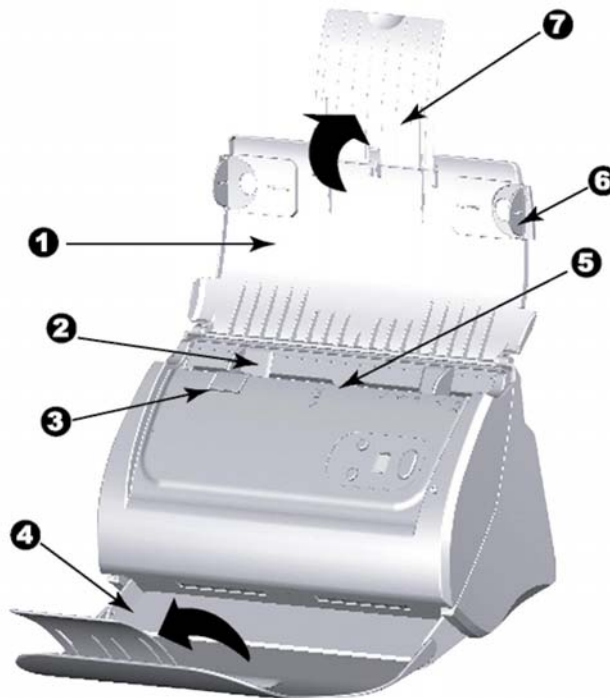

³ Extended Paper Width Slider is not included in all scanner models.

⁴ Protection Sheet is not included in all scanner models.

⁵ Padded Carrying Bag is not included in all scanner models.

⁶ Pad Module is not included in all scanner models.

THE SCANNER OVERVIEW⁷

1. PAPER CHUTE COVER—Helps keep the paper in place. Open paper chute cover when using the scanner.
2. PAPER WIDTH SLIDER—Adjusts the paper width slider for the paper size you are using.

3. COVER OPEN LEVER—Opens the ADF cover. Pull it to open the ADF cover when you need to clear paper jam or clean the scanner.
4. STACKER—Keeps the paper in place. Extend it in case of longer paper.

⁷ The scanner illustration(s) in this manual may appear different than from the actual scanner itself.

⁸ Extended Paper Width Slider is not included in all scanner models.

5. ADF (AUTOMATIC DOCUMENT FEEDER)—Automatically feeds a stack of documents for scanning.
6. SIDE GUIDE—Holds the paper in place to be scanned through the ADF. Pull side guides out to hold the paper.
7. PAPER CHUTE EXTENSION—Extends to hold longer paper.

8. UP BUTTON—Press to move forward the scanning task number indicated in the function number display.
9. DOWN BUTTON—Press to move backward the scanning task number indicated in the function number display.
10. FUNCTION NUMBER DISPLAY—Indicates the number of the predefined scanning task selected by the up or down button.
11. SCAN BUTTON—Press to perform a predefined scanning task selected by the up or down button.
12. POWER LED—Indicates the scanner status.

Light	Status
Green	The scanner is turned on, ready to scan images.
Orange	The scanner is in standby mode if it is idle for 10 minutes.
Off	The scanner is off, either because the power is not turned on, or because the AC adapter is not properly plugged into an AC power outlet.

- 13. HAND HOLDER—Ergonomically designed for you to carry the scanner with ease.
- 14. USB PORT—Connects the scanner to a USB port on your computer by the included USB cable.
- 15. POWER RECEPTOR—Connects the scanner to a standard AC power outlet by the included AC adapter.
- 16. POWER SWITCH—Use this to turn the scanner ON or OFF.

ULTRASONIC SENSOR

When scanning a stack of documents by ADF, the ultrasonic sensor detects multifeeds by checking paper overlap (i.e., 2 or more pages stuck together when being fed through the ADF). Clean the ultrasonic sensor lightly with a dry cloth if it is necessary.

 <p>Information</p>	<p>This function may or may not be available depending on the scanner model you purchase.</p>
---	---

CHAPTER I . I NSTALLING THE SCANNER

Before installing your scanner, please verify that you have all of the proper components. A list of the package contents is provided in the “Box Contents” section of this guide.

SOFTWARE I NSTALLATI ON REQUI REMENTS

Your scanner comes with the scanner’s driver and MacAction. All of these software applications use approximately 800 megabytes of hard disk space after they are installed into your computer. To ensure ample room for the installation, as well as for scanning and saving images, a minimum of 2 GB of hard disk space is recommended.

This USB scanner can only operate under the Mac OS X 10.8 / 10.9 / 10.10 / 10.11 / 10.12 / 10.13 operating system.

HARDWARE REQUI REMENTS

This scanner connects to your computer through the Universal Serial Bus (USB) which supports HOT PLUG AND PLAY. To determine whether your computer is USB-capable, you must check the rear of your PC to locate a USB jack that looks like the picture below. If you are having trouble in locating the USB port on your computer, please refer to the hardware manual that came with your computer.

Upon examination, you should find one or two rectangular USB ports, which usually appear as shown below.

If you don’t find such USB ports on your computer, then you need to purchase a certified USB interface card to add USB capabilities to your computer.

INSTALLING AND SETTING UP THE SCANNER

Please follow the step-by-step procedures described below to install the Plustek scanner.

Attention

Choose a Proper Site First!

- Always place your scanner on a level, smooth and strong surface before proceeding the scanner setup or any scanning task.
- Tilted or uneven surface may cause paper-feeding errors, scanner damage or personal injury.
- Avoid using the scanner in a dusty environment. Dust particles and other foreign objects may damage the unit.

Step 1. Connecting the Scanner to Your Computer

Attention

Please make sure the scanner is turned OFF before you plug or unplug the scanner power adapter.

1. Plug the AC adapter into the scanner's power receptor .
2. Plug the other end of the AC adapter into a standard AC power outlet.

3. Plug the square end of the included USB cable to the USB port  at the rear of the scanner.
4. Plug the rectangular end of the USB cable to an available USB port on your computer.
5. If you plan to connect your scanner to a USB hub⁹, make sure that the hub is connected to the USB port in your computer. Next, connect the scanner to the USB hub.

Step 2. Installing the Software

1. Switch on the scanner power from the rear of the scanner.
2. Insert the Mac Setup/Application CD-ROM, included with your scanner, into your CD-ROM drive and a [Plustek Scanner] CD icon  will show on the desktop of your Mac OS X.
3. Double-click on the CD icon, and a window will pop up displaying the file folder.
4. Double-click on the setup file [Setup], and the Scanner Installer will start to guide you through the installation. Follow the on-screen guide in the installer window.
5. You will be prompted to enter your Mac administrator password. Enter the password to continue the installation. **Note: Only the Mac administrator can perform the installation. Please make sure that you log in the Mac OS as an administrator.**
6. When the installation finishes, click the [Close] button to exit the installer.

 Attention	<ul style="list-style-type: none">● Save the Setup/Application CD in case you need to reinstall the driver and software in the future.● Save the Calibration Sheet in case you need to calibrate the scanner in the future.
---	--

Step 3. Install the Extended Paper Width Slider¹⁰

1. Open the ADF cover by pulling the lever, and get the right and left extended paper width sliders ready.
2. Align and Insert the left extended paper width slider onto the paper width slider on the left. Position and Insert the right extended paper width slider onto the paper width slider on the right.

⁹ The USB hub is not included with the scanner.

¹⁰ Extended Paper Width Slider is not included in all scanner models.

3. Close the ADF cover by pushing it back down until it snaps back into place.

Step 4. Install the Stacker

Insert the tabs on the stacker onto their slots on the scanner.

Information

The installation of stacker is optional, if you have limited desktop space.

Step 5. Testing the Scanner

The following describes how you can check if the scanner is properly functioning with your computer and the scanning software. Before testing your scanner, double check to make sure that all connections are securely fastened.

To test the ADF scanning:

1. Load a document headfirst and face down into the ADF with the text side facing the paper chute.

2. Click the icon  in the Dock.
3. Within the “Button Configuration” window, select a task number by clicking on the icon. Select the desired function from the drop-down list of Button Template and adjust button settings. Select **ADF (Front Side)** as the Scan Type. Click **OK** to exit the “Button Configuration” window.
4. Right-click the icon  in the Dock, and then choose **Execute** in the pop-up menu that opens. Click the desired button function item in the pop-up menu.
5. The document in the ADF paper chute should be now loaded into the ADF and scanned. The scanner starts to scan immediately and carry out the corresponding action according to settings you have set up in the “Button Configuration” window.

CHAPTER 11 . SCANNING

Your scanner needs to be driven by certain type of software program. Since all documents or images (whether text or pictures) that are acquired from the scanner are treated by your computer as images, most scanning will probably be done from an image-editing program where you can view, edit, save and output the scanned images.

What about scanning text documents and editing them in a word processor? This is the role of Optical Character Recognition (OCR) software. OCR software converts the image files that are created from scanning text documents into text files that can be viewed, edited and saved by word processors.

The MacAction program, seamlessly integrating the operation of your scanner with your computer and other peripherals, provides a quick and convenient way to perform various scanning functions. With MacAction, you don't need to adjust settings every time you scan. Simply press any button on the scanner's front panel or click any scanning menu item of MacAction on the screen. The scanner starts to scan your paper documents and transfer them to your assigned destination. The destination can be a printer, your E-mail program, files on your disk drives, an image-editing program, etc.

Please refer to the online help of each program to guide you through any questions you may have while scanning within that program.

This chapter describes three important steps of scanner operations. Read them thoroughly and follow the instructions to ensure correct use and optimal scanner performance.

Step 1. Preparing Documents

Step 2. Placing Documents, Placing Business Cards, Placing Plastic Cards,
Placing Documents with the Protection Sheet¹¹

Step 3. Scanning Documents

PREPARING DOCUMENTS

Proper document preparation prior to the scan can prevent paper feed errors and damages to the scanner.

- Checking Document Conditions
- Loosening Documents

¹¹ Protection Sheet is not included in all scanner models.

Checking Document Conditions

Make sure the size and ream weight of your documents are acceptable by the scanner. Refer to “Appendix A: Specifications” of this guide for more information.

To scan multiple documents in a batch from the ADF can increase your work efficiency and make large scanning tasks easier. The ADF of this scanner accepts a variety of paper and stationery you may use in your daily work or personal life, such as:

- Normal paper whose size and ream weight meet the requirements stated in “Appendix A: Specifications” of this guide.
- Notched paper
- Coated paper (e.g., brochure)

To prevent paper feeding errors and damages to the ADF unit, strictly follow the instructions below:

- Remove all small objects e.g., paper clips, pins, staples or any other fasteners attached, before loading the paper into the ADF.
- Make sure the paper is completely flat with no creased or curled corners.
- Avoid scanning documents with pencil lead and newspaper clippings as they will make the ADF exposure glass and the inner ADF dirty. If you have to scan such paper, clean the scanner frequently (refer to “Chapter III. Care and Maintenance” of this guide for more information).
- The paper for each batch scanned by ADF can be of the same or different weights. However, make sure the length of each scan batch is the same.

However, don't use the ADF to scan documents if they meet any of the following conditions:

- Paper lighter than 50 g/m² (14 lb.) or heavier than 105 g/m² (28 lb.)
- Paper with clips or staples attached
- Paper with inconsistent thickness, e.g., envelopes
- Paper with wrinkles, curls, folds, or tears
- Paper with an odd (non-rectangular) shape
- Paper with static electricity
- Tracing paper
- Carbon paper, pressure sensitive paper, carbonless paper

- Items other than paper, e.g., cloth, metal foil.

Attention

- DO NOT use the ADF to scan photographic sheets or particularly valuable document originals; wrinkles or other damages can happen in case of paper feeding errors.
- DO NOT place paper with wet ink or correction fluid into the ADF. Wait few minutes for it to get dry.

Loosening Documents

Before loading documents into the ADF, loosen them as follows:

1. Fan the documents so that no two pages are sticking together. Make sure to remove static electricity from paper.

2. Hold the documents upside down with both hands, and then gently push them onto a flat surface to align the edges of all documents.

This will allow documents being fed into the ADF one at a time and prevent paper-feeding errors.

PLACING DOCUMENTS

1. Load the documents, headfirst and face down, toward the center of the ADF paper chute and all the way into the ADF until touching the bottom.

For single-sided scans, load the documents face down so that the side to be scanned faces towards the paper chute.

For double-sided scans, load the desired page order of documents face down so that the side to be scanned faces towards the paper chute.

2. If you need to scan longer documents, unfold the paper chute extension and side guide to provide further support for the documents.

3. Adjust the paper width slider for the paper size you are using. The paper width slider should be gently touching both sides of the documents.

Attention

- DO NOT load more than 50 sheets of paper (70 g/m², 18 lb.) to the ADF.
- Paper scanned from the ADF must be a minimum of 5.08 x 5.08 cm (2" x 2", W x L).
- Make sure there are no gaps between the document stack and the paper-width slider; otherwise, the scanned images can be skewed.
- Although the documents should be loaded firmly in place ensuring optimum scanning accuracy, they should never be wedged in so tightly that the process of feeding them through the scanner is strained.
- Do not load additional paper into the ADF while the unit is feeding and scanning.

PLACING BUSINESS CARDS

1. Load the business cards, headfirst and face down, toward the center of the ADF and all the way into the ADF until touching the bottom.

For single-sided scans, load the business cards face down.

For double-sided scans, load the business cards in desired order.

2. Adjust the paper width slider to the business card width. The paper width slider should be gently touching both sides of the business cards.

Attention

Don't load more than 20 business cards in one batch.

PLACING PLASTIC CARDS

The plastic card can be embossed credit card, driver license, ID card, insurance card, medic-care card or any membership card. Make sure to load the embossed face of the embossed card face up into the scanner. If the scanned images are not good enough, please remove the pad module before you load the plastic card.

1. Open the ADF cover by pulling the cover open lever.

2. Remove the pad module by pressing the open knob of the pad module and pull it out.

3. Close the ADF cover by pushing it back down until it snaps back into place.
4. Horizontally load the plastic card, headfirst and face up, toward the center of the ADF.

For single-sided scans, load the card face up.

For double-sided scans, load the card in desired order.

5. Adjust the paper width slider to the card width. The paper width slider should be gently touching both sides of the card.

- Make sure the plastic cards you wish to scan are horizontally loaded into the ADF.
- Maximum thickness of each plastic card is 1.2 mm.

PLACING DOCUMENTS WITH THE PROTECTION SHEET¹²

To avoid paper jam and documents be scratched, the protection sheet is designed for you to load and protect special documents. It allows you to scan a document that is not easy to load into the scanner. For example, paper with an odd (non-rectangular) shape, wrinkles, curls, folds, as well as stamps, magazine and newspaper clippings. You can also use the protection sheet when you scan photographs and valuable documents so they won't be scratched. If the scanned images are not good enough, please remove the pad module before you load the protection sheet.

1. Open the ADF cover by pulling the cover open lever.

2. Remove the pad module by pressing the open knob of the pad module and pull it out.

3. Close the ADF cover by pushing it back down until it snaps back into place.

¹² Protection Sheet is not included in all scanner models.

4. To scan a document with large page size, spread the page to be scanned facing outwards and neatly fold it in half from the center.

5. Open the protection sheet and place the document inside, headfirst and face down, toward the center of the sheet and all the way until touching the bottom of the sheet. Align the top of the document to the side of the protection sheet with the black line, and the folded portion toward to the right side of the sheet.

6. Load the protection sheet into the scanner, and align the protection sheet with the black line toward the center of the ADF.

7. For single-sided scans, load the protection sheet face down.
For double-sided scans, load the protection sheet in desired order.
8. Adjust the paper width slider to the protection sheet width. The paper width slider should be gently touching both sides of the sheet.

Attention

When you are using the protection sheet for scanning, please load the sheet of papers one by one.

SCANNING DOCUMENTS

There are 3 different ways to operate the scanner:

1. By scanning from the buttons on the scanner front panel.
2. By scanning from MacAction's Execute menu on the screen.
3. By scanning from the icon in the left side of the MacAction window.

The MacAction software is automatically installed to your system along with the scanner driver.

Before you start scanning, check the following:

- The power of both your computer and scanner is turned on.
- Paper is appropriately loaded into the ADF.

Scanning from the Scanner's Front Panel

To complete your scanning projects by using the scanner buttons is very easy and convenient. The number of scanning task displayed on the scanner's front panel is configured through MacAction. MacAction offers you quick access to the most frequently-used scanning functions. They are especially useful when you need to repeatedly scan with the same settings and send images to the same destination. Before performing your first scan via scanner buttons, you are recommended to configure the button settings to your needs and preferences first.

Scan from the Scanner Buttons

1. Place the document or images onto the scanner. (Refer to "Chapter II. Scanning" of the Scanner User's Guide for more information in placing paper into the ADF properly.)
2. Check current button settings by viewing the Button Configuration window. If needed, you may also modify settings to meet your current needs. (Refer to "View Button Settings" and "Configure Button Settings" below for more information.)
3. Press the UP or DOWN button to select the desired task.
4. Press the **Scan** button.

The scanner starts to scan immediately and carry out the corresponding action according to settings you have set up in the Button Configuration window.

Place only text documents for OCR purposes. Do not scan a photo using the OCR button.

Configure Button Settings

Within the “Button Configuration” window, you can find a row of icons running through the left side of the window. Each icon represents a scanning task, and the number underneath corresponds to the function number displayed on the scanner front panel. Nine frequently-used scanning tasks are pre-configured for your convenience to start scanning immediately. You may, however, customize the settings of every nine tasks to best meet your needs and preferences. Follow the steps described below:

1. Do one of the following to open the Button Configuration window:
 - Double-click the icon  in **Finder > Applications > Plustek > Your scanner model name**.
 - Click the icon  in the Dock.
 - Right-click the icon  in the Dock, and then choose **Button Configuration...** in the pop-up menu that opens.
2. Select a task number by clicking on the icon.
3. Select the desired function from the drop-down list of Button Template and adjust button settings.

Click the **Help** button within the Button Configuration window for more information about the settings.

View Button Settings

There are three ways to view the button settings:

- Double-click the icon  in **Finder > Applications > Plustek > Your scanner model name**.
- Click the icon  in the Dock.
- Right-click the icon  in the Dock, and then choose **Button Configuration...** in the pop-up menu that opens.

Scanning from the On-screen MacAction’s Execute Menu

You may also use MacAction's on-screen Execute menu to perform the same scanning tasks. The MacAction program provides a quick and convenient way to perform various scanning functions. Follow the steps described below:

1. Place the document or images onto the scanner.
2. Check current button settings by viewing the Button Configuration window. If needed, you may also modify settings to meet your current needs.

3. Right-click the icon  in the Dock, and then choose **Execute** in the pop-up menu that opens.
4. Click the desired button function item in the pop-up menu.

The scanner starts to scan immediately and carry out the corresponding action according to settings you have set up in the Button Configuration window.

Scanning from the Icon in the Left Side of the MacAction Window

You can perform scanning task by double-clicking the icon in the left side of the MacAction window. Follow the steps described below:

1. Place the document or images onto the scanner.
2. Check current button settings by viewing the Button Configuration window. If needed, you may also modify settings to meet your current needs.
3. Double-clicking the desired icon in the left side of the MacAction window.

The scanner starts to scan immediately and carry out the corresponding action according to settings you have set up in the Button Configuration window.

CHAPTER III. CARE AND MAINTENANCE

Your scanner is designed to be maintenance-free. However, constant care and maintenance can keep your scanner working smoothly.

CLEANING THE SCANNER

Paper powder, dust, ink and toner from paper being scanned may make the inner ADF dirty, which leads to poor image quality or document-feeding errors. How often to clean your scanner depends on the type of paper and number of pages being scanned.

Perform the following procedures to clean the scanner surface and the ADF unit. Gently wipe locations described herein. Do not rub too hard.

Warning

- Before cleaning the scanner, turn off the scanner and disconnect the scanner's power cable and USB cable, and then wait a few minutes for the glass and/or the inner ADF to cool to ambient temperature.
- Wash your hands with soap and water after cleaning the scanner.

Cleaning Materials

Have the following cleaning materials ready to clean the scanner:

- soft, dry, lint-free cloth (or a cotton swab)
- **non-abrasive cleaner**—Isopropyl alcohol (95%). DO NOT use water.

Attention

- Alternatively you can use glass cleaner or neutral detergent for windows cleaning to clean the scanner glass.
- However, DO NOT use either of them to clean the ADF feed roller or pad module.
- Use of other cleaning materials could damage your scanner.

Cleaning the ADF

1. Open the ADF cover by pulling the lever.

2. Gently wipe the following areas with the cloth dampened with the cleaner. Be careful NOT to scratch their surfaces.

Clean Feed Roller:

Wipe the Feed Roller from side to side and then rotate it. Repeat this until its entire surface is cleaned.

Clean Pad Module:

Wipe the Pad Module from top to bottom (in the direction of arrow shown in below picture). Be careful not to damage the pick springs of the pad.

Clean ADF Glass:

Do not spray cleaner directly onto the scanner glass. Excess liquid residue may fog or damage the scanner.

3. Wait for cleaned areas to dry completely.

4. Close the ADF cover by pushing it back down until it snaps back into place.

REPLACING CONSUMABLES

As a guideline, it is recommended to replace the pad module every 50000 sheets of scans. It is also recommended to purchase a new protection sheet¹³ if it can't be used for scanning due to serious damage.

Replacing the Pad Module

1. Open the ADF cover by pulling the cover open lever.

2. Remove the pad module by pressing the open knob of the pad module and pull it out.

¹³ Protection Sheet is not included in all scanner models.

3. Install the new pad module by inserting the tabs on the module onto their slots on the scanner.
4. Close the ADF cover by pushing it back down until it snaps back into place.

Replacing the Feed Roller

1. Open the ADF cover by pulling the cover open lever.

2. Open the roller cover by pinching both sides of the roller cover.

3. Remove the feed roller and pull it out.

4. Install the new feed roller by aligning and inserting the feed roller onto the roller pitman on the scanner.

5. Close the roller cover by pushing it back down until it snaps back into place.
6. Close the ADF cover by pushing it back down until it snaps back into place.

CALIBRATING THE SCANNER

Attention

Please uninstall the extended paper width sliders before you start the calibration.

Calibrate the scanner if colors appear in areas that should be white, or colors of the scanned image and the original vary a lot. This allows you to adjust and compensate for variations that can occur in the optical component over time by its nature.

The following describes how to calibrate the scanner:

1. The Calibration Sheet, marked with an arrow on either edge at both sides, is used specially for **ADF Scanning** calibration.
2. Insert the special calibration sheet into the ADF of the scanner, with an arrow toward the scanner buttons.

Attention

Please insert the special calibration sheet included with the scanner. Alternatively you may also use any plain white sheet of paper sized in Letter/A4 instead; however, the calibration effect may be less good than the special calibration sheet.

3. Right-click the icon  in the Dock, and then choose **Calibration_Wizard** in the pop-up menu that opens.
4. Click on the **Start** button to begin the calibration process.
5. The scanner pulls the calibration sheet through the scanner, which completes this scanner calibration. After the calibration is complete, click **OK**.

POWER SAVE

To save power consumption, when the scanning process is finished, the scanner light source will turn itself off and the scanner will enter a lower-power mode without delay time.

Information

- The scanner will enter the standby mode after it is idle for 10 minutes. Simply press any scanner button on the scanner panel and the scanner will be back to the normal status.
- Right-click the icon  in the Dock, and then choose **Scanner Utility** in the pop-up menu that opens. Refer to the online help of MacAction to explore more about standby mode.

CHAPTER I V. TROUBLESHOOTING

If you encounter problems with your scanner, please review the installation and scanning instructions contained in this guide.

SCANNER CONNECTION

The first step to take when troubleshooting connection problems with your scanner is to check all physical connections. The icon , located on the Dock indicates if the scanner software is properly launched and the scanner and computer are communicating with each other.

Appearance	Status
	The program has been successfully launched and the scanner is connected with the computer, ready to scan images.
No Display	You have chosen to terminate the program, no matter the scanner is connected or disconnected with the computer.

CLEARING PAPER JAMS

If a paper jam in the ADF happens, please perform the following steps:

1. Remove any unjammed documents still loaded into the ADF.
2. Open the ADF cover by pulling the cover open lever.
3. Gently but firmly pull the jammed documents out of the ADF. Try to avoid creasing or wrinkling the documents.

Attention

Do not try to pull jammed or half-scanned documents out of the ADF without first opening the ADF cover. Doing so may permanently damage the ADF.

4. Close the ADF cover by pushing it back down until it snaps back into place.

APPENDIX A: SPECIFICATIONS¹⁴

Plustek PS388U & PS296	
Image Sensor	CIS x 2
Light Source	LED
Optical Resolution	600 dpi
Hardware Resolution	600 x 600 dpi
Scan Modes	Color: Input 48-bit, Output 24-bit Grayscale: Input 16-bit, Output 8-bit Black & White: 1-bit
ADF Capacity	1. 50 sheets (A4/ Letter, 70 g/m ² or 18 Lbs), Max. thickness under 5mm (0.2"). 2. 20 sheets (Business Cards). 3. Plastic Card, Max. thickness under 1.2 mm. Note: Maximum ADF capacity varies, depending upon paper weight.
Scanning Speed (ADF)	30 ppm/ 60 ipm (Grayscale mode, 200 & 300 dpi, A4 Portrait) 30 ppm/ 60 ipm (B&W mode, 200 & 300 dpi, A4 Portrait) 30 ppm/ 60 ipm (Color mode, 200 & 300 dpi, A4 Portrait) Note: Results may vary depending upon your scanning application, computer processor and system memory.
Scanning Area (W x L)	Max: 216 x 5080 mm (8.5" x 200") Min: 13.2 x 13.2 mm (0.52" x 0.52")
Acceptable Paper Sizes (W x L)	Max: 220 x 5080 mm (8.66" x 200") Min: 63.5 x 50.8 mm (2.5" x 2")
Acceptable Paper Weight (Thickness)	50 to 105 g/m ² (14 to 28 Lbs)
Multi-feed Detection	With ultrasonic technology
Daily Duty Scan (Sheets)	4,000
Roller Lifetime (Scans)	300,000
Pad Lifetime (Scans)	50,000
Action Button	3 Buttons: Up, Down, Scan. 9 Function Keys. All Customizable.
Power Supply	24 Vdc/ 0.75 A

¹⁴ Hardware specifications may change at any time without prior notice.

Interface	USB 2.0
Net Weight	1.66 Kgs (3.66 Lbs)
Dimensions (W x D x H)	263 x 128 x 148 mm (10.36" x 5.02" x 5.83")
Protocol	TWAIN Compliant

Plustek PS3060U	
Image Sensor	CCD x 2
Light Source	LED
Optical Resolution	600 dpi

APPENDIX B: CUSTOMER SERVICE AND WARRANTY

Please visit our website www.plustek.com for more customer service information. For further assistance, visit our website or call our customer support phone number listed on the website. One of our representatives will be happy to assist you from Monday through Friday in office working hours.

To avoid delays, please have the following information available before calling:

- Scanner name and model number
- Scanner serial number (Located at the bottom of the scanner)
- Scanner CD version and part number
- A detailed description of the problem
- Your computer manufacturer and its model number
- The speed of your CPU
- Your current operating system and BIOS (optional)
- Name of software package(s), version or release number and manufacturer of the software
- Other USB devices installed

SERVICE & SUPPORT INFORMATION (FOR EU COUNTRY ONLY)

Where appropriate, the period of availability of spare parts and the possibilities of upgrading products information. Please ask local distributors and suppliers for spare parts information and product upgrade information.

Information requested by relevant Implementing Measure. Please ask local distributors and suppliers for the related information of Implementing Measure test report.

Do not dispose anything of products before you ask local distributors and suppliers to get correct information for decreases of environmental impact with right methods and procedures.

If you want to disposals the product and/or an accessory, please ask local distributors and suppliers to get the contact information of nearest disposal manufactures.

If you have any maintenance inquiry, please ask local distributors and suppliers to get the contact information of nearest maintenance center in order to extend the product usage life time.

If you want to maintain and clear the product, please ask local distributors and suppliers to get the right information of nearest stores.

STATEMENT OF LIMITED WARRANTY

This Statement of Limited Warranty applies only to the options you originally purchase for your use, and not for resale, from an authorized reseller.

The manufacturer warranty includes all parts and labor, and is not valid without the receipt of original purchase. To obtain warranty service, you may contact the authorized dealer or distributor, or visit our website to check out the available service information, or send a request via E-mail for further help.

If you transfer this product to another user, warranty service is available to that user for the remainder of the warranty period. You should give your proof of purchase and this statement to that user.

We warrant that this machine will be in good working order and will conform to its functional descriptions in the documentation provided. Upon provision of proof of purchase, replacement parts assume the remaining warranty of the parts they replace.

Before presenting this product for warranty service, you must remove all programs, data and removable storage media. Products returned without guides and software will be replaced without guides and software.

This Limited Warranty service does not provide for carry-in exchange when the problem results from accident, disaster, vandalism, misuse, abuse, unsuitable environment, program modification, another machine or non-vendor modification for this product.

If this product is an optional feature, this Limited Warranty applies only when the feature is used in a machine for which it was designed.

If you have any questions about your Limited Warranty, contact the approved retailer from whom you bought the product or the manufacturer.

THIS LIMITED WARRANTY REPLACES ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. HOWEVER, SOME LAWS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES. IF THESE LAWS APPLY, THEN ALL EXPRESS AND IMPLIED WARRANTIES ARE LIMITED IN DURATION TO THE WARRANTY PERIOD. NO OTHER WARRANTIES APPLY AFTER THAT PERIOD.

Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply.

Under no circumstances are we liable for any of the following:

1. Third party claims against you for losses or damages.

2. Loss of, or damage to, your records or data; or
3. Economic consequential damages (including lost profits or savings) or incidental damages, even if we are informed of their possibility.

Some jurisdictions do not allow the exclusion or limitations of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This Limited Warranty gives you specific legal rights, and you may also have other rights that vary from jurisdiction to jurisdiction.

FCC RADIO FREQUENCY STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular television reception (which can be determined by turning the equipment off and on), the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that which the receiver is connected.
- Shielded interconnect cables and shielded power cord which are supplied with this equipment must be employed with this equipment to ensure compliance with the pertinent RF emission limits governing this device.
- Consult the dealer or an experienced radio/TV technician for help if the conditions persist.
- Changes or modifications not expressly approved by the manufacturer or authorized service center could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
